DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 – Method for calculating a temporal interference pattern as a superposition of the plurality of temporal interference patterns – claims 13-16

Species 2 – Method for forming a volume hologram comprising deposition of a layer and imparting a pattern onto a slab face of a planar waveguide by deformation of the deposited layer – claims 21-32 and 44-51

Species 3 – Method for forming a volume hologram comprising imparting a pattern onto a material layer and depositing the patterned material layer onto the slab face of the planar waveguide substrate – claims 33-38

Species 4 - Method for forming a volume hologram comprising imparting a pattern onto at least one surface of a support slab and pressing and bonding the patterned support slab against a planar waveguide substrate – claims 39-43

Species 5 - Method for forming a volume hologram comprising spatially selectively exposing a photosensitive optical medium - claims 52-58

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1 and 17 appear to be generic.

Art Unit: 2872

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571) 272-2306. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.
